Jungseob **Lee**

NLP Researcher · Ph.D. Student, Korea University

1995.10.11 | omanma1928@korea.ac.kr | js-lee-ai.github.io
js-lee-AI | LinkedIn | Google Scholar

Summary

Integrated M.S./Ph.D. researcher at the Korea University NLP Lab (Advisor: Prof. Heuiseok Lim), specializing in large language models and natural language processing, with a focus on agentic LLMs, LLM efficiency, and efficient reasoning. First-author research has been published at **EMNLP 2026** (Main), **ACL 2025** (Oral), and **Findings of ACL 2024**. Four papers were accepted at **EMNLP 2026** (2 Main, 2 Findings), with co-authored work at **ICLR 2026** and a series of preprints under review. Recipient of the **Best Paper Award (Top 1)** at HCLT 2025. Served as the post-training Project Manager and Korea University representative for **VAETKI**, Korea's national Sovereign AI Foundation Model. Author of 20+ peer-reviewed papers across top-tier NLP venues and journals.

Research Interests: Large Language Models, Natural Language Processing, Agentic LLM, LLM Efficiency, Efficient Reasoning

Education

Korea University *Seoul, Korea*
Integrated M.S./Ph.D. in Computer Science *2021 – Present*
NLP Lab, Advisor: Prof. Heuiseok Lim. Research focus: large language models, natural language processing, agentic LLM, LLM efficiency, and efficient reasoning. · **Expected: Feb. 2027**

Work Experience & Major Projects

VAETKI, Korean Sovereign AI Foundation Model *Jun 2025 – Jan 2026*
Post-training Project Manager, Korea University Representative *NC AI (NCSOFT)-led consortium*

- Served as post-training PM representing Korea University in Korea's national **Sovereign AI Foundation Model** program, organized by the Ministry of Science and ICT, an approximately KRW 200 billion national initiative with staged six-month evaluations running through 2027.
- The Korea University team (Prof. Heuiseok Lim) was selected as a core research partner in the NC AI (NCSOFT)-led grand consortium of 14 industry–academia–research institutions and 40 adopters (including POSCO DX, Lotte Innovate, KAIST, ETRI, and MBC).
- Led the full post-training pipeline for the VAETKI model, covering Supervised Fine-Tuning (SFT), Reinforcement Learning, and dataset curation.
- **VAETKI model:** an industry-specialized sovereign foundation model, open-sourced on Hugging Face on Dec 30, 2025. A 100B+ parameter Mixture-of-Experts architecture (∼11B active parameters at inference) with a custom Multi-head Latent Attention (MLA) reducing memory usage by up to ∼83%.
- Achieved state-of-the-art results on Korean language and culture (CLIcK), advanced reasoning (KoBALT), professional knowledge (KMMLU-Pro), and instruction following (IFEval).
- [Model] [Technical Report]
- Press: [Korea University] [AI Times] [Newstomato]

Multilingual Post-Training Datasets, Sovereign AI Foundation Model Program *Aug 2026*
Dataset Builder, Korea University with NC AI *AI Hub, download for Korean nationals only*

- Built and released two post-training datasets of the program on AI Hub, Korea's national AI data platform, with NC AI (NCSOFT) leading and Korea University building and extending the data.
- **High-Quality Multi-Turn Dataset**, multi-turn post-training dialogues in Korean, English, Japanese, and Chinese across six domains (general chat, code, general reasoning, math, culture, and long-context RAG), 664M tokens.
- **Synthetic & Instruction Dataset**, 858,960 model-synthesized instruction-response samples in the same four languages and six domains, with chain-of-thought reasoning, about 5.8 GB.
- [Multi-Turn Dataset] [Synthetic & Instruction Dataset]

KURE-v3, Korean-English Retrieval Embedding Model *2026*

Core Contributor, Korea University NLP & AI Lab and HIAI Institute *Data synthesis, training optimization, experiments*

- The newest dense model of the **KURE** family of Korean-English retrieval models (250+ GitHub stars), released on Oct 20, 2026 with open weights on Hugging Face and a public API.
- Synthesized the training data, 3M+ query-document triplets with mined hard negatives and false-negative filtering.
- Optimized training with teacher-score distillation (a min-max normalized KL loss), Matryoshka embeddings from 2,048 down to 256 dimensions, and inputs of up to 8,192 tokens.
- Ran the experiments on the nine MTEB(kor, v2) retrieval tasks and English RTEB against 20+ open retrievers.
- With 1.1B parameters KURE-v3 scores 0.803 average nDCG@10, above much larger dense retrievers such as Qwen3-Embedding-8B and the 27B harrier-oss-v1, and keeps 99% of its score at 1,024 dimensions.

Cross-lingual Language Transfer for Large Language Models *2024 – 2025*

Lead Researcher (first author) *Published at ACL 2025 (Oral)*

- Proposed a cross-lingual optimization method that efficiently transfers English-centric LLMs to new target languages while preserving source-language ability, accepted as an **Oral** presentation at ACL 2025.
- [PDF]

Efficient Reasoning for Large Reasoning Models *2025 – Present*

Lead Researcher (first author) *Findings of EMNLP 2026, preprints under review*

- Leading a first-author line of work on training-free adaptive thinking budgets (DART) and stable efficiency training via adaptive correct-only rewards (ACOER) for large reasoning models. DART was accepted to **Findings of EMNLP 2026**.
- Co-first author of **ThinkFuse**, a trajectory-aware test-time fusion method for small reasoning models, accepted to **Findings of EMNLP 2026**.
- [DART] [ACOER] [Code]

Polyglot, Open-Source Multilingual Language Models *2022*

Open-Source Contributor, EleutherAI

- Worked on efficient language transfer of pretrained language models with cross-lingual post-training (XPT) and MAD-X adapters, and also took part in pretraining.
- [GitHub]

Awards & Honors

Outstanding Reviewer Award *2026*

The 64th Annual Meeting of the Association for Computational Linguistics (ACL 2026), San Diego

Recognized by the ACL program committee for review quality and service to the conference. [Certificate]

Best Paper Award (Top 1) *2025*

Annual Conference on Human and Cognitive Language Technology (HCLT 2025)

For *KULLM-RAG: A RAG-Specialized Large Language Model with Intelligent Self-Verification*, by **J. Lee** (first author), M. Kim, J. Yoon, S. Hong, Y. Jang, S. Lee, J. Seo, C. Park, J. Park, and H. Lim, from Korea University, Soongsil University, and Human-Inspired AI Research.

Minister of Science and ICT Award *2023*

ICT Challenge 2023, Ministry of Science and ICT (organized by IITP)

Team of M. Kang, **J. Lee**, and S. Lee, for *KoCheckGPT*, Korean-specialized detection of LLM-generated documents for enterprise security, selected from 79 teams (263 participants) across 28 universities. [Press]
