Summary

Integrated M.S./Ph.D. researcher at Korea University NLP Lab (Advisor: Prof. Heuseok Lim), working on large language models and natural language processing — agentic LLMs, efficient reasoning, machine translation, information retrieval, and model merging. First-author work at **EMNLP 2026** (Main), **ACL 2025** (Oral), and **Findings of ACL 2024**; four papers accepted at **EMNLP 2026** (2 Main, 2 Findings). Served as post-training Project Manager (Korea University representative) for **VAETKI**, Korea's sovereign foundation model.

Research Interests: Large Language Models, Agentic LLM, Efficient Reasoning, Machine Translation, Information Retrieval, Model Merging

Education

Integrated M.S./Ph.D. in Computer Science

Korea University, Seoul, Korea

2021 – Present

Expected: Feb. 2027

- NLP Lab, Advisor: Prof. Heuseok Lim — large language models, agentic LLM, efficient reasoning, machine translation, information retrieval, and model merging

Research Experience

VAETKI — Korean Sovereign AI Foundation Model

Post-training Project Manager — Korea University Representative

Jun 2025 – Jan 2026

NC AI (NCSOFT)-led consortium

- Led the post-training pipeline (SFT, RL, dataset curation) as PM for Korea University; selected by the Ministry of Science and ICT for Korea's national Sovereign AI Foundation Model program (NC AI-led 14-institution consortium; open-sourced Dec 2025).
- State-of-the-art on Korean language/culture (CLiCK), reasoning (KoBALT), professional knowledge (KMMLU-Pro), and instruction following (IFEval).

Cross-lingual Language Transfer for Large Language Models

Lead Researcher (first author)

2024 – 2025

Published at ACL 2025 (Oral)

- Cross-lingual optimization that transfers English-centric LLMs to new languages while preserving source-language ability; **Oral** at ACL 2025.

Length-aware Byte Pair Encoding for Korean Machine Translation

Lead Researcher (first author)

2024

Published at Findings of ACL 2024

- Length-aware BPE tokenization that mitigates over-segmentation in Korean machine translation and improves translation quality; **Findings of ACL 2024**.

Awards & Honors

Outstanding Reviewer Award

2026

The 64th Annual Meeting of the Association for Computational Linguistics (ACL 2026), San Diego

Best Paper Award (Top 1)

2025

Annual Conference on Human and Cognitive Language Technology (HCLT 2025)

For “*KULLM-RAG: A RAG-Specialized Large Language Model with Intelligent Self-Verification*”; **J. Lee** (first author), M. Kim, J. Yoon, *et al.* — Korea University, Soongsil University, Human-Inspired AI Research.

Minister of Science and ICT Award

2023

ICT Challenge 2023, Ministry of Science and ICT (organized by IITP)

For “*KoCheckGPT*”, Korean-specialized detection of LLM-generated documents; team M. Kang, **J. Lee**, S. Lee — selected from 79 teams across 28 universities.
