

Jungseob Lee

NLP Researcher · Ph.D. Student, Korea University

1995.10.11 | omanma1928@korea.ac.kr | js-lee-ai.github.io

js-lee-AI | LinkedIn | Google Scholar

Summary

Integrated M.S./Ph.D. researcher at the Korea University NLP Lab (Advisor: Prof. Heuiseok Lim), specializing in large language models and natural language processing — with a focus on agentic LLMs, LLM efficiency, and efficient reasoning. First-author research has been published at **EMNLP 2026** (Main), **ACL 2025** (Oral), and **Findings of ACL 2024**. Four papers were accepted at **EMNLP 2026** (2 Main, 2 Findings), with co-authored work at **ICLR 2026** and a series of preprints under review. Recipient of the **Best Paper Award (Top 1)** at HCLT 2025. Served as the post-training Project Manager and Korea University representative for **VAETKI**, Korea's national Sovereign AI Foundation Model. Author of 30+ peer-reviewed papers across top-tier NLP venues and journals.

Education

Integrated M.S./Ph.D. in Computer Science — *2021 – Present*

Korea University, Seoul, Korea — **Expected: Feb. 2027**

- NLP Lab, Advisor: Prof. Heuiseok Lim.
- Research focus: large language models, natural language processing, agentic LLM, LLM efficiency, and efficient reasoning.

Research Interests

Large Language Models · Natural Language Processing · Agentic LLM · LLM Efficiency · Efficient Reasoning

Work Experience & Major Projects

VAETKI — Korean Sovereign AI Foundation Model — *Jun 2025 – Jan 2026*

Post-training Project Manager — Korea University Representative — NC AI (NCSOFT)-led consortium

- Served as post-training PM representing Korea University in Korea's national **Sovereign AI Foundation Model** program, organized by the Ministry of Science and ICT — an approximately KRW 200 billion national initiative with staged six-month evaluations running through 2027.
- The Korea University team (Prof. Heuiseok Lim) was selected as a core research partner in the NC AI (NCSOFT)-led grand consortium of 14 industry–academia–research institutions and 40 adopters (including POSCO DX, Lotte Innovate, KAIST, ETRI, and MBC).
- Led the full post-training pipeline — Supervised Fine-Tuning (SFT), Reinforcement Learning, and dataset curation — for the VAETKI model.
- **VAETKI model:** an industry-specialized sovereign foundation model, open-sourced on Hugging Face on Dec 30, 2025. A 100B+ parameter Mixture-of-Experts architecture (11B active parameters at inference) with a custom Multi-head Latent Attention (MLA) reducing memory usage by up to 83%.

- Achieved state-of-the-art results on Korean language and culture (CLIcK), advanced reasoning (KoBALT), professional knowledge (KMMLU-Pro), and instruction following (IFEval).
- [Model] [Technical Report]
- Press: [Korea University] [AI Times] [Newstomato]

Cross-lingual Language Transfer for Large Language Models *2024 – 2025*
Lead Researcher (*first author*) Published at ACL 2025 (Oral)

- Proposed a cross-lingual optimization method that efficiently transfers English-centric LLMs to new target languages while preserving source-language ability; accepted as an **Oral** presentation at ACL 2025.
- [PDF]

Efficient Reasoning for Large Reasoning Models *2025 – Present*
Lead Researcher (*first author*) Findings of EMNLP 2026; preprints under review

- Leading a first-author line of work on training-free adaptive thinking budgets (DART) and stable efficiency training via adaptive correct-only rewards (ACOER) for large reasoning models; DART was accepted to **Findings of EMNLP 2026**.
- Co-first author of **ThinkFuse**, a trajectory-aware test-time fusion method for small reasoning models, accepted to **Findings of EMNLP 2026**.
- [DART] [ACOER] [Code]

Awards & Honors

Outstanding Reviewer Award *2026*
The 64th Annual Meeting of the Association for Computational Linguistics (ACL 2026), San Diego
Recognized by the ACL program committee for review quality and service to the conference. [Certificate]

Best Paper Award (Top 1) *2025*
Annual Conference on Human and Cognitive Language Technology (HCLT 2025)
For "*KULLM-RAG: A RAG-Specialized Large Language Model with Intelligent Self-Verification*"; **J. Lee** (first author), M. Kim, J. Yoon, S. Hong, Y. Jang, S. Lee, J. Seo, C. Park, J. Park, H. Lim — Korea University; Soongsil University; Human-Inspired AI Research.

Minister of Science and ICT Award *2023*
ICT Challenge 2023, Ministry of Science and ICT (organized by IITP)
Team M. Kang, **J. Lee**, S. Lee, for "*KoCheckGPT*" — Korean-specialized detection of LLM-generated documents for enterprise security; selected from 79 teams (263 participants) across 28 universities. [Press]
